	1.	All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.	
	2.	This is MeanWell's suggested range, please consult your battery manufacturer for their suggestions about maximum charging current limitation.	
	3.	Derating may be needed under low input voltage. Please check the derating curve for more details.	
	4.	Constant current operation region is within 50~100% rated output voltage.	
	5.	The power supply is considered as an independent unit, but the final equipment still need to re-confirm that whole system complies with the EMC directives.
