Application

ÖLFLEX® SERVO FD 798 CP cables are high-flexible, screened, oil-resistant, halogen free, signal (encoder and resolver) cables with an outer sheath of Polyurethane. They are designed for use in high-dynamic applications with acceleration up to 50 m/s² in power chains as well as for fixed installation. They are also suitable for use in dry, damp or wet areas. They are suitable for outdoor use if the indicated temperature range is observed.
ÖLFLEX® SERVO FD 798 CP cables are increased resistant to oils and at room temperature largely resistant to acids and alkalis. The outer sheath withstands high mechanical stresses, in particular abrasion and dragging. It is also cut proof and resists microbes and hydrolysis. They are especially suitable for increased requirements (Extended Line) in power chains and in permanently moved machine parts. They are suitable for linear, automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.
The screening braid protects against interference from electrical fields.

Application range:
Connecting cable between servo controller and encoder/resolver / speed generators, in power chains or moving machine parts, particularly in wet areas of machine tools and transfer lines, assembly lines, production lines, in all kinds of machines.

Use acc. to : Style 20236: External interconnection or internal wiring.
Style 21165: Internal wiring
Style 20549: Internal wiring of electronic equipment and appliances
Use acc. to : Internal or external interconnection with or without mechanical load conditions.

General requirements	These cables are conform to the EU-Directives 2011/65/EU (RoHS, Restriction of the use of certain hazardous substances). As this product is designed for appropriate use in a voltage range of < 50 V AC resp. < 75 V DC, it is not subject to the Low Voltage Directive 2014/35/EU.
Environmental information	These cables meet the substance-specific requirements of the EU Directive 2011/65/EU (RoHS).
