

Hlavní parametry

| | |
|----------------------------|---|
| Řada výrobků | Zelio Time |
| Typ produktu nebo součásti | Modulární časové relé |
| Označení přístroje | RENF22 |
| Operační systém | Android |
| Verze software | V4.4 and above |
| Popis software | Zelio NFC (downloadable from Google Play store) |

Doplněk

| | |
|--------------------------------|--|
| Typ diskrétního výstupu | Reléový |
| Jmenovitý výstupní proud | 8 A |
| Typ a složení kontaktu | 2 Z/V časově zpožděný kontakt, bez kadmia 1 C/O timed and instantaneous contact, cadmium free |
| Typ časového zpoždění | A Ac Ad Ah Ak At B Bw C D Di H Ht L Li Lt N O P Pt Qt Tl Tt W Lit Dt Dit Qtt |
| Rozsah časového zpoždění | 0.1 s...999 h |
| Kompatibilita | NFC enabled mobile device |
| [Us] jmenovité napájecí napětí | 24...240 V AC/DC |
| Vstupní napětí | <= 2,4 V |
| Rozsah napětí | 0,85 - 1,1 Un |
| Jmenovitý výkon | 0.0002 mW |
| Maximální provozní frekvence | 13.56 MHz |
| Frekvence sítě | 50...60 Hz +/- 5 % |
| Připojení - svorky | Screw terminals 1 x 0.5...1 x 3.3 mm ² AWG 20...AWG 12 solid cable without cable end Screw terminals 2 x 0.5...2 x 2.5 mm ² AWG 20...AWG 14 solid cable without cable end Screw terminals 1 x 0.2...1 x 2.5 mm ² AWG 24...AWG 14 flexible cable with cable end Screw terminals 2 x 0.2...2 x 1.5 mm ² AWG 24...AWG 16 flexible cable with cable end |
| Kroutící moment | 0,6...1 N.m podle IEC 60947-1 5.3...8.8 lbf.in podle IEC 60947-1 |

| Materiál pláště | Samozhášecí |
|---|---|
| Opakovatelná přesnost | +/- 0.2 % for 10 s...999 h time delay range +/- 0.5 % for 100 ms...10 s time delay range |
| Teplotní odchylka | +/- 0,05 %/°C |
| Odchylka napětí | +/-0,2 %/V |
| Přesnost nastavení časového zpoždění | +/- 1 % for 1...999 h time delay range at 25 °C +/- 2 % for 1 h time delay range at 25 °C +/- 20 ms for 100 ms...10 s time delay range at 25 °C |
| Minimální délka pulzu | 100 ms s paralelní zátěží 60 ms no-load |
| Izolační odpor | 100 MΩ při 500 V DC podle IEC 60664-1 |
| Doba resetu | 120 ms on de-energisation |
| Příkon ve VA | 3 VA při 240 V AC |
| Příkon ve W | 1,5 W při 240 V DC 0,6 W při 24 V DC |
| Spínací schopnost ve VA | 2000 VA |
| Minimální spínací proud | 10 mA at 5 V |
| Maximální spínací proud | 8 A |
| Maximální spínací napětí | 250 V |
| Elektrická životnost | 100000 cycles at 8 A, 250 V AC on resistive load |
| Mechanická životnost | 10000000 cykly |
| [Uiimp] jmenovité impulzní výdržné napětí | 5 kV pro 1,2/50 µs podle IEC 60664-1 |
| Zpožděná odezva | <= 100 ms |
| Povrchová vzdálenost | 4 kV/3 podle IEC 60664-1 |
| Kategorie přepětí | III podle IEC 60664-1 |
| Data o spolehlivosti a bezpečnosti | MTTFd = 227.5 years for 100 % duty cycle continuous operating condition at 30 °C |
| Montážní poloha | Libovolná poloha |
| Montážní držák | 35 mm DIN lišta podle EN/IEC 60715 |
| Místní signalizace | Un, zelená LED: (trvalá) pro napájení ON R1, pryskyřicová LED: (trvalá) pro relé napájeno R1, pryskyřicová LED: (blikající) pro probíhá časování R2, pryskyřicová LED: (trvalá) pro relé napájeno R2, pryskyřicová LED: (blikající) pro probíhá časování Pairing, zelená LED: (trvalá) pro stav komunikace Un, zelená LED: (fast blinking) pro diagnosis mode |
| Pracovní dosah | 10 mm |
| Doba odezvy | 2 s |
| Šířka | 22,5 mm |
| Hmotnost přístroje | 0.0904 kg |

Životní prostředí

| | |
|-------------------------------------|--|
| odolnost proti mikropřerušením | 10 ms |
| dielektrická pevnost | 2.5 kV for 1 mA/1 minute at 50 Hz between relay output and power supply with basic insulation with basic insulation |
| standardy | EN 61000-6-1 EN 61000-6-2 EN 61000-6-3 EN 61000-6-4 EN 61812-1 |
| směrnice | 2014/30/EU - electromagnetic compatibility 2014/35/EU - low voltage directive 2014/53/EU - radio equipment directive |
| certifikace výrobku | CE CSA UL KC |
| teplota okolního vzduchu pro provoz | -20...60 °C |
| teplota okolí pro uskladnění | -40...70 °C |
| stupeň krytí IP | IP20 na svorky podle IEC 60529 IP40 na skříňka podle IEC 60529 IP40 na čelní podle IEC 60529 |
| stupeň znečištění | 3 podle IEC 60664-1 |

| | |
|--------------------------|--|
| odolnost proti vibracím | 20 m/s ² při 10...150 Hz podle IEC 60068-2-6 |
| odolnost proti otřesům | 15 gn (mimo provoz) během 11 ms podle IEC 60068-2-27 5 gn (za provozu) během 11 ms podle IEC 60068-2-27 |
| relativní vlhkost | 95 % při 25...55 °C |
| elektromag.kompatibilita | <p>Test odolnosti proti elektrostatickému výboji (testovací úroveň: 6 kV, úroveň 3 - vybíjecí kontakt) podle EN/IEC 61000-4-2</p> <p>Test odolnosti proti elektrostatickému výboji (testovací úroveň: 8 kV, úroveň 3 - odvod vzdachu) podle EN/IEC 61000-4-2</p> <p>Test odolnosti proti rychlým přechodovým dějům (testovací úroveň: 1 kV, úroveň 3 - kapacitní propojovací spona) podle IEC 61000-4-4</p> <p>Test odolnosti proti rychlým přechodovým dějům (testovací úroveň: 2 kV, úroveň 3 - přímý kontakt) podle IEC 61000-4-4</p> <p>Test odolnosti proti špičkám (testovací úroveň: 1 kV, úroveň 3 - rozdílový režim) podle IEC 61000-4-5</p> <p>Test odolnosti proti špičkám (testovací úroveň: 2 kV, úroveň 3 - společný režim) podle IEC 61000-4-5</p> <p>Test odolnosti proti vyzařovanému radiofrekvenčnímu elektromagnetickému poli (testovací úroveň: 10 V, úroveň 3 - 0,15 – 80 MHz) podle IEC 61000-4-6</p> <p>Test odolnosti proti elektromagnetickému poli (testovací úroveň: 10 V/m, úroveň 3 - 80 MHz...1 GHz) podle IEC 61000-4-3</p> <p>Odolnost proti mikroprušením a poklesům napětí (testovací úroveň: 30 % - 500 ms) podle IEC 61000-4-11</p> <p>Odolnost proti mikroprušením a poklesům napětí (testovací úroveň: 100 % - 20 ms) podle IEC 61000-4-11</p> <p>Rádiové vyzařování, třída B podle EN 55022</p> <p>Vyzařování vedením, třída A podle EN 55022</p> <p>Test odolnosti proti elektromagnetickému poli (testovací úroveň: 3 V/m, úroveň 2 - 1,4 GHz...2 GHz) podle IEC 61000-4-3</p> <p>Test odolnosti proti elektromagnetickému poli (testovací úroveň: 1 V/m, level 1 - 2...2,7 GHz) podle IEC 61000-4-3</p> |

Internal Wiring Diagram

Wiring Diagram

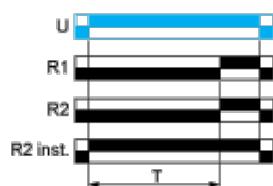

Function A: Power On-Delay Relay

Description

On energisation of power supply, the timing period T starts. After timing, the output(s) R close(s).The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

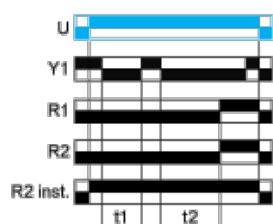

Function At: Power On-Delay Relay with Pause / Summation Control Signal

Description

On energisation of power supply, the timing period T starts.Timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, the output(s) R close(s).The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$$T = t_1 + t_2 + \dots$$

Function Ac: On-Delay and Off-Delay Relay with Control Signal

Description

After energisation of power supply and energization of Y1 causes the timing period T to start.

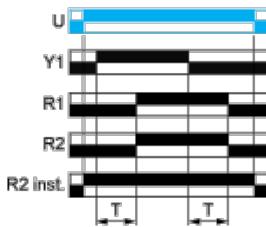

At the end of this timing period, the output(s) R close(s).

When deenergization of Y1, the timing T starts.

At the end of this timing period T, the output(s) R revert(s) to its/their initial position.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Ad : Pulse Delayed Relay with Control Signal

Description

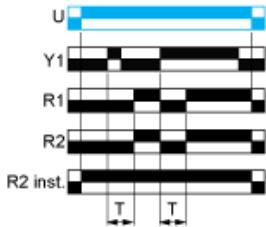

After energisation of power supply, pulsing or maintaining of energization of Y1 starts the timing T.

At the end of this timing period T, the output(s) R close(s).

The output(s) R reverts to its initial position the next time Y1 is energized in pulsation or permanent energized manner.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Ah : Pulse Delayed Relay (Single Cycle) with Control Signal

Description

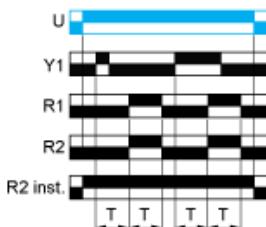

After energisation of power supply, pulsing or maintaining of energization of Y1 starts the timing T.

A single flashing cycle then starts with 2 timing periods T of equal duration (start with output(s) R in initial position). Output(s) R closes at the end of the first timing period T and reverts to its initial position at the end of the second timing period T.

Re-energizing of Y1, either in pulsation or permanent energized manner, will re-start the single flashing cycle again.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Ak: Asymmetrical On-Delay and Off-Delay Relay With Control Signal

Description

After energisation of power supply and energization of Y1, timing starts for a period Ta.

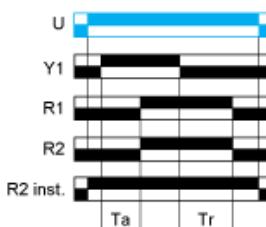

At the end of this timing period Ta, the output(s) R closes.

Deenergization of Y1 causes a second timing period Tr to start.

At the end of this timing period Tr, the output(s) R reverts to its initial state.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

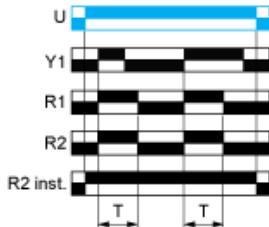

Function B: Single Interval Relay with Control Signal

Description

After energisation of power supply, pulsing or maintaining of energization of Y1 starts the timing T. The output(s) R close(s) for the duration of the timing period T then revert(s) to its/their initial state. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

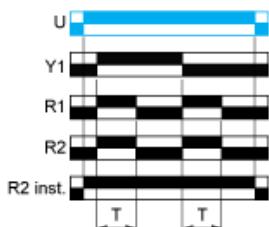

Function Bw : Double Interval Relay with Control Signal

Description

After energisation of power supply, transition of Y1 (either from energization to deenergization or vice-versa) will cause the output(s) R close(s) for the duration of the timing period T then revert(s) to its/their initial state.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

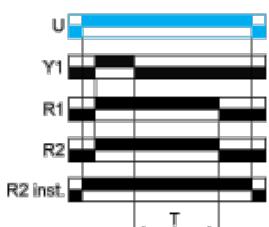

Function C: Off-Delay Relay with Control Signal

Description

After energisation of power supply and energization of Y1 causes output(s) R close(s). When Y1 deenergizes, timing T starts. At the end of this timing period T, the output(s) R revert(s) to its/their initial position. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

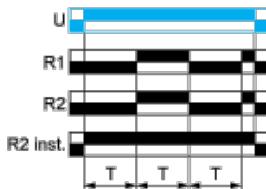

Function D: Symmetrical Flashing Relay (Starting Pulse-Off)

Description

On energisation of power supply, output(s) R starts at its/their initial state for timing duration T then change(s) to output(s) R close(s) for the same timing duration T. This cycle is repeated indefinitely until power supply removal. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

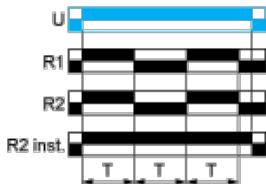

Function Di: Symmetrical Flashing Relay (Starting Pulse-On)

Description

On energisation of power supply, output(s) R starts at output(s) R close(s) for timing duration T then revert(s) to its/their initial state for the same timing duration T. This cycle is repeated indefinitely until power supply removal. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

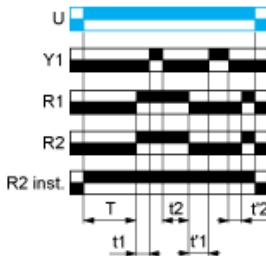

Function Dt: Symmetrical Flashing Relay (Starting Pulse-Off) With Pause / Summation Control Signal

Description

On energisation of power supply, output(s) R starts at its/their initial state for timing duration T and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, then changes to output (s) R close(s). The output(s) R close state will remain for the same timing duration T and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, the output(s) R revert(s) to its/their initial state. This cycle is repeated indefinitely until power supply removal. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$$T = t_1 + t_2 + \dots$$

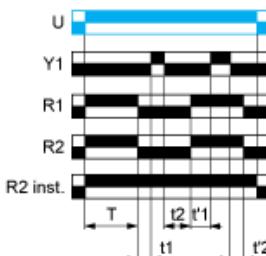

$$T = t'_1 + t'_2 + \dots$$

Function DIT: Symmetrical Flashing Relay (Starting Pulse-On) With Pause / Summation Control Signal

Description

On energisation of power supply, output(s) R starts at output(s) R close(s) for timing duration T and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, then revert(s) to its/their initial state. The output(s) R at initial state will remain for the same timing duration T and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, the output(s) R change(s) to close state. This cycle is repeated indefinitely until power supply removal. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$T = t_1 + t_2 + \dots$

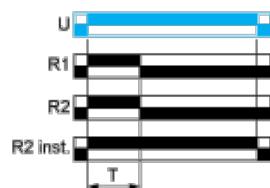

$T' = t'_1 + t'_2 + \dots$

Function H: Interval Relay

Description

On energisation of power supply, output(s) R close(s) and timing period T starts. At the end of the timing period T, the output(s) R revert(s) to its/their initial state. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

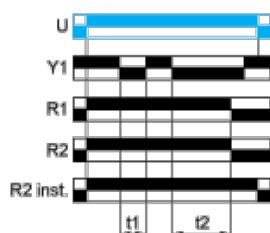

Function Ht: Interval Relay With Pause / Summation Control Signal

Description

On energisation of power supply, output(s) R close(s) and timing period T starts. The timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value T, the output(s) R revert(s) to its/their initial state. The second output (R2) can be either timed (when set to "TIMED" or instantaneous (when set to "INST").

Function: 2 Output

$T = t_1 + t_2 + \dots$

Function L: Asymmetrical Flashing Relay (Starting Pulse-Off)

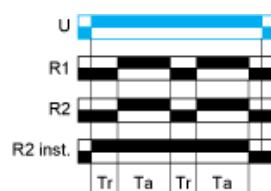

Description

On energisation of power supply, output(s) R starts at its/their initial state for timing duration Tr then change(s) to output(s) R close(s) for the another timing duration Ta.

This cycle is repeated indefinitely until power supply removal.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Li: Asymmetrical Flashing Relay (Starting Pulse-On)

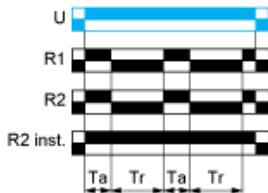

Description

On energisation of power supply, output(s) R starts at output(s) R close(s) for timing duration Ta then change(s) to its/their initial state for timing duration Tr.

This cycle is repeated indefinitely until power supply removal.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Lt: Asymmetrical Flashing Relay (Starting Pulse-Off) With Pause / Summation Control Signal

Description

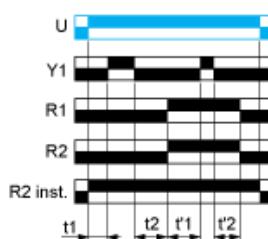

On energisation of power supply, output(s) R starts at its/their initial state for timing duration Tr and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value Tr, then changes to output(s) R close(s).

The output(s) R close state will remain for the same timing duration Ta and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value Ta, the output(s) R revert(s) to its/their initial state.

This cycle is repeated indefinitely until power supply removal.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$$Tr = t_1 + t_2 + \dots$$

$$Ta = t'_1 + t'_2 + \dots$$

Function Lit: Asymmetrical Flashing Relay (Starting Pulse-On) With Pause / Summation Control Signal

Description

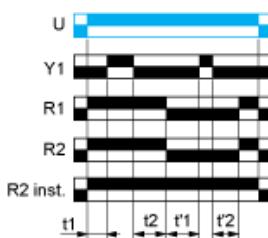

On energisation of power supply, output(s) R starts at output(s) R close(s) for timing duration Ta and the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value Ta, the output(s) R revert(s) to its/their initial state.

The output(s) R at initial state will remain for timing duration Tr the timing can be interrupted / paused each time Y1 energizes. When the cumulative total of time periods elapsed reaches the pre-set value Tr, then changes to output(s) R close(s)

This cycle is repeated indefinitely until power supply removal.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$$Ta = t_1 + t_2 + \dots$$

$$Tr = t'_1 + t'_2 + \dots$$

Function N : Safe-Guard Relay

Description

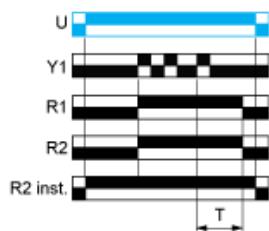

After energisation of power supply and on energization of Y1 cause the output(s) R close(s) and starts the timing T.

If the duration interval between 2 consecutive energization of Y1 is greater than the pre-set value T, the output(s) R close(s) at the end of the timing period.

If the duration interval between 2 consecutive energization of Y1 is less than the pre-set value T, the output(s) R remain(s) closed and timing restarted base on the last energization of Y1.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function O : Delayed Safe-Guard Relay

Description

On energisation of power supply, the timing T starts.

At the end of this timing period, the output(s) R close(s).

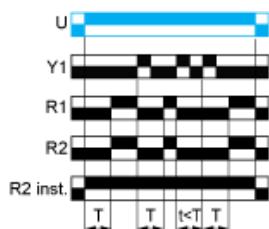

On energization of Y1, the output(s) R revert(s) to its/their initial state and the timing T restarts.

If the duration interval between 2 consecutive energization of Y1 is greater than the pre-set value T, the output(s) R close(s) at the end of the timing period.

If the duration interval between 2 consecutive energization of Y1 is less than the pre-set value T, the output(s) R remain(s) at its/their initial state and timing restarted base on the last energization of Y1.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function P : Pulse Delayed Relay with Fixed Pulse Length

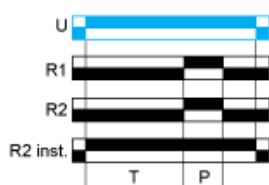

Description

On energisation of power supply, the timing T starts.

At the end of this period, the output(s) R close(s) for a fixed time P then revert(s) to its/their initial state.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$P = 500\text{ms}$

Function Pt : Pulse Delayed Relay With Fixed Pulse Length and Pause / Summation Control Signal

Description

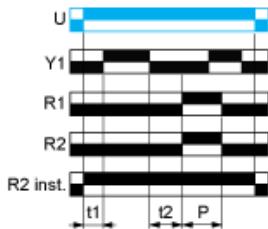

On energisation of power supply, the timing T starts.

The timing can be interrupted / paused each time Y1 energizes.

When the cumulative total of time periods elapsed reaches the pre-set value T, the output(s) R close(s) for a fixed time P then revert(s) to its/their initial state.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

$T = t_1 + t_2 + \dots$

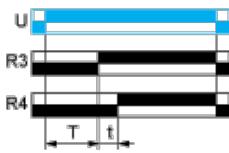

$P = 500\text{ms}$

Function Qt: Star-Delta Relay (2 CO Outputs with Split Common)

Description

On energisation of power supply, the output R3 & R4 initializes at its initial state such that energizes STAR CONTACTOR + MAIN CONTACTOR and the timing T starts (STAR connection time duration starts).At the end of the timing period T, the output R3 closes such that deenergizes STAR CONTACTOR and causes t transition time starts.At the end of the transition time, the output R4 closes such that energizes DELTA CONTACTOR.

Function: 2 Output

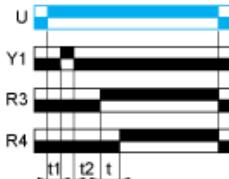

$T = 50, 60\dots \text{ms}$

Function Qtt: Star-Delta Relay (2 CO Outputs With Split Common) with Pause / Summation Control Signal

Description

On energisation of power supply, the output R3 & R4 initializes at its initial state such that energizes STAR CONTACTOR + MAIN CONTACTOR and the timing T starts (STAR connection time duration starts).During STAR connection time, the timing can be interrupted / paused each time Y1 energizes.When the cumulative total of time periods elapsed reaches the pre-set value T, the output R3 closes such that deenergizes STAR CONTACTOR and causes t transition time starts.At the end of the transition time, the output R4 closes such that energizes DELTA CONTACTOR.

Function: 2 Output

$T = t_1 + t_2 + \dots$

$t = 50, 60 \dots \text{ms}$

Function TL : Bistable Relay with Control Signal On

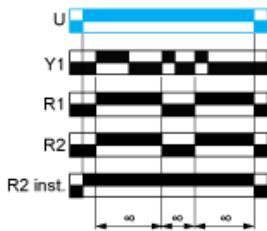

Description

After energisation of power supply and on energization of Y1 cause the output(s) R close(s). The subsequent on energization of Y1 cause the output(s) R revert(s) to its/their initial state.

This cycle is repeated indefinitely until power supply removal.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Function Tt : Retriggerable Bistable Relay with Control Signal On

Description

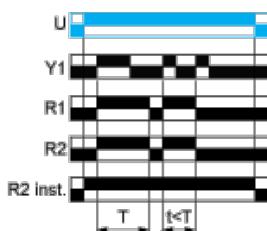

After energisation of power supply and on energization of Y1 cause the output(s) R close(s) and starts the timing T.

If the duration interval between 2 consecutive energization of Y1 is greater than the pre-set value T, the output(s) R will toggle from its/their present status the end of the timing period.

If the duration interval between 2 consecutive energization of Y1 is less than the pre-set value T, the output(s) R toggle from its/their present status as soon as Y1 energizes without completing T duration.

The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

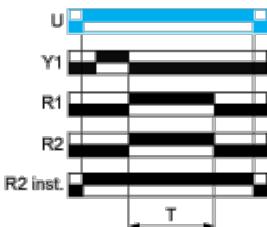

Function W: Interval Relay with Control Signal Off

Description

After energisation of power supply and on energization of Y1 following by deenergization of Y1, the output(s) R close(s) and starts the timing T. At the end of the timing period, the output(s) R revert(s) to its/their initial state. The second output (R2) can be either timed (when set to "TIMED") or instantaneous (when set to "INST").

Function: 2 Output

Legend

- Relay de-energised
- Relay energised
- Output open
- Output closed

U - Supply

R1/R22 timed outputs

Ta - Adjustable On-delay

Tr - Adjustable Off-delay

Y1 - Retrigger / Restart control

R2 The second output is instantaneous if the right position is selected
inst.

T - Timing period

R4 - Delta contact output

t - Delay to switch ON Delta contact output

R3 - Star-Delta contact output
