## TEV-2 TEV-3

### Thermostat

02-209/2016 Rev.: 1

#### Characteristics

- single thermostat with possibility of temperature management in adjustable range (it is possible to modify this range or make a special one on request)
- it is used to regulate heating (or cooling) in demanding environments (outside, humidity, dustiness, etc.)
- thermostat is placed in water-proof box with IP65, which enables installation outside, with in-built sensor (included in the supply)
- TEV-2 - control and indication elements are placed under transparent cover, TEV-3 - control and indication elements are placed directly on the cover (for easy orientation and frequent change of temperature)
- thermostat status is indicated by LED (2 colours)
- function of monitoring sensor disconnection and short-circuit
- output changeover contact 16 A (AC1)

#### Description

TEV-2 - without cover

TEV-3 - cover

1. Device status indication
2. Temperature setting
3. Terminal for sensor
4. Terminals for connection of supply voltage and output contact
5. Sleeve for incoming cables

Warning

The device is constructed to be connected into 1-phase main and must be installed in accordance with regulations and norms applicable in a particular country. Installation, connection and setting can be done only by a person with an adequate electro-technical qualification which has read and understood this instruction manual and product functions. The device contains protections against over-voltage peaks and disturbing elements in the supply main. To ensure correct function of these protection elements it is necessary to front-end other protective elements of higher degree (A, B, C) and screening of disturbances of switched devices (contactors, motors, inductive load etc.) as it is stated in a standard. Before you start with installation, make sure that the device is not energized and that the main switch is OFF. Do not install the device to the sources of excessive electromagnetic disturbances. By correct installation, ensure good air circulation so the maximal allowed operational temperature is not exceeded in case of permanent operation and higher ambient temperature. While installing the device use screwdriver width approx. 2 mm. Keep in mind that this device is fully electronic while installing. Correct function of the device is also depended on transportation, storing and handling. In case you notice any signs of damage, deformation, malfunction or missing piece, do not install this device and claim it at the seller. After operational life treat the product as electronic waste.
