KAISER ceiling penetration sealing systems DS 90 / 120 mm and DS 90 / 74 mm ensure that the ceiling maintains fire-resistance class EI30 - EI90. To efficiently prevent the spread of fire and flue gases through cable penetrations and electrical installation conduits through concrete or cellular concrete ceilings, their fire sealing must have the same fire-resistance class as the ceiling. The ceiling penetration sealing system DS 90 accomplishes this easily, quickly and reliably.

· Secure, visible, certified fire sealings
· Sealing especially for ceiling penetrations
· Automatic sealing without filling or smearing
· Non-destructive retrofitting
· Also for mixed population of bundles of cables and conduits
· Easy and quick installation from above
