

LB 10 Lance drill 9103

CE
6/2022

Areas of application:

For the exact hole in hollow bricks, tiles and earthenware. (When drilling in solid bricks and concrete the drill dust is not carried away, so the LB is therefore not adequate.)

Product details:

Content box	1
Drill-Ø mm	10
length of shaft	250

Mounting and usage instructions:

Use medium to high r.p.m. when drilling.

Product benefits/properties:

The drilling requires no percussion. Ideal for drilling holes in tiles, ceramics and glass - the cutting edge geometry is designed so that trouble-free drilling of hard, brittle materials can be executed and material breakage is avoided.

Technical data:

Material	Glass cutting drill bits with steel shank and carbide brazed cutting edge. Product contains no relevant substances in terms of REACH regulation EC (No 1907/2006).
----------	--

Weight per piece 135,00 g

GTIN (EAN)

The LB lance drill is also ideal for tiling and ceramics.
